Type of surface: Asphalt

Elevation (ft): 8466

PCN: 062FBXT

Manny staff: Oscar Piña Guerrero / Josue López/ Mario Alberto Longares / Pedro Antonio Reyes García.

CIQ INTERNATIONAL PROCESS AT MMTO / TLC

INTERNATIONAL ARRIVALS.

Once the aircraft is positioned on the general aviation apron, Manny's staff will brief the crew on the process that will be carried out during the operation to then proceed to the General Aviation building where the authorities will be ready for the inspection of both passengers and crew.

Customs, National Guard and SENASICA will board the aircraft to perform a physical inspection for it to be released.

1.- IMMIGRATION: Passport inspection. Each foreign national (either passenger or crew) will be given an immigration form, **which must be always kept during their stay** and deliver it for their departure (in case of losing it, there will be a delay at departure of approximately 1 hour).

2.- CUSTOMS: Each passenger will be given a customs declaration that must be signed and delivered to the customs officer. **All passengers and crew's luggage** will be checked through the X-ray machine, then, the customs officer will ask some questions to the passengers and continue with the customs light (green light means review is not needed, red light means luggage manual inspection). Additionally, a **random** luggage inspection could be performed with the K9.

3.- SENASICA (Arrivals only):

K9 inspection is performed to find perishable products that are not allowed. If indicated by the SENASICA agent, a manual inspection of the luggage will be carried out.

4.- NATIONAL GUARD: Manual inspection of passenger and crew's baggage.

At the end of the process at the General Aviation building, passengers will be transferred to the FBO, where they will receive their luggage so that they can continue to their destination. The crew will head back to the aircraft to be towed to the FBO and may request additional services from the handler.

INTERNATIONAL DEPARTURES.

The aircraft will be then towed from the FBO to the general aviation apron with the crew on board.

Passengers will be transferred from the FBO to the General Aviation building in a transportation provided by Manny.

Once the aircraft is positioned on the General Aviation apron, Customs and National Guard will board the aircraft to perform a physical inspection to clear.

1.- IMMIGRATION: Passport inspection. Passengers and crew members must individually deliver to the immigration officer their passports and the immigration form that they received upon their arrival.

2.- CUSTOMS: Each passenger will receive a cash declaration that must be signed and delivered to the customs officer. **All passengers and crew's luggage** will be checked through the X-ray machine. Additionally, a **random** inspection of luggage could be performed with the K9.

3.- NATIONAL GUARD: Random inspection of passenger and crew's luggage.

Once the process is complete, Manny staff will guide passengers and crew back to the aircraft for them to board and conclude the operation at this location.
